OF THE WEEK-PERSONAL AND

The fall season is here, so far as society people erned, and if the weather holds good there will be a large turnout at the matches for the polo championship, to be played under the aus-pices of the Polo Association, on the Prospect Park grounds on Tuesday and Friday next. There will be large delegations present from New-York and Westchester, and already Park Commissioner Squier is overrun with applications for carriage space from those who have fine teams and wish to bring them out on the days of the matches. The Country Club, of Westchester, and the Myopia Club, of Massachusetts, will meet on Tuesday, and the players from Rockaway will meet the winners on Friday afternoon. The games will be called at 2:30 p. m. on each day, and as the Myopias are credited with ability to win the game with the Westchester team, and there is little to choose between them and the Rockaway players, the final contest is likely to be a fight worth seeing. The teams will play under their respective colors; Westchester, scarlet with white cap; Myopia, light blue, with white sash and cap; Rockaway, dark blue, with white sash and cap; Rockaway, dark blue, with white his first of a series of annual matches which will probably be played on the same grounds, and as the admission costs nothing beyond the expense of a trip to the park there will undoubtedly be a great crowd present to watch the games and get points on how to ride a horse.

INVESTIGATING GREANT'S ACCOUNTS.

THEY SHOW, IF HIS ALLEGATIONS ARE TRUE, . THAT THERE WERE BIG PROFITS IN HIS BUSINESS.

County Treasurer Taylor yesterday completed a scarch of the records in his office for the purpose of learning how much money for contract work was paid out to John E. Greany, the contractor, who swears to having been compelled to make loans aggregating over \$20,000 to Supervisors Barry, Beanem, Donohue and Carreck, and to ex-Warden Dovie, Martin, the janitor, and Chief Engineer

Clancy. The amounts tabulated are as follows: \$11,188 72 1891 \$40,607 53 \$4,086 14 1892 14,526 59 6,184 00 1893 499 77 1,280 69 25,082 92 Total in 9 years \$117,938 97 12,361 62 Total in 9 years \$117,938 97

800 00 1,000 00 Total in 9 years. \$20,129 82 1,500 00

Greany says that he has "loaned" much more money than this to county officials. He says he had to pay out about one-fourth of all the money he got. If that is a fact it is reasonable to figure that he made as much profit as he gave away, and this would mean that the real value of the goods sold to the county was about one-half of what was paid for them.

Justice Goetting, in the Lee Avenue Police Court yesterday, remanded John McMahon, of No. 82 Lorimer-st., without bail to await the result of the injuries to James Ryan, a stableman, of No. 631/2

Ryan is in a critical condition in St. Catherine's Hospital suffering from a fractured skull. He was found on Wednesday unconscious in the stable at Lorimer and Scholes sts., where he was employed, and was believed to have been kicked by a horse. When the man regained consciousness Friday he told the hospital attendants that McMahon had as-aulted him with a pitchfork hapdle during a quarrel. It is feared that Ryan will die.

THE "CONTINUOUS RAIL" DOESN'T WORK

COMPLAINTS ABOUT THE NOISE OF THE NASSAU

TROLLEY-CARS IN FLATBUSH.

A good many complaints are heard from people

living on the line of the Nassau Trolley Company

in Flatbush on account of the extraordinary noise created by the passing cars. This is exactly the

opposite of what was expected and promised when the construction of the road was undertaken. Not

only did the company glowingly proclaim its in-tention of carrying passengers a hitherto unknown distance for the modest fare of five cents, but it laid special emphasis on the fact that the road was

to be perfectly smooth and the cars to run with so little joiting that a cup of water would not be

spilled in transit. Perhaps no such absolute promise was made, but at any rate it was affirmed that both joiling and noise would be reduced to a minimum. This was to be accomplished by welding the ralls by means of electricity at the joints, thus making practically a continuous rail and avoiding the shocks that occur whenever the point where two rails come together is passed by the carwheels.

wheels.
